

Seattle Select Stance Flexion Knee

The Seattle Select Stance Flexion Knee is a tough polycentric unit which functions to a much higher level than might be expected from a pneumatically controlled knee. The Stance Phase Sensitivity can be adjusted by changing the instant centre of rotation (ICR), which makes the transition into swing phase more or less sensitive.

The flexion and extension resistances of the swing phase control are also independently adjustable, as is the stance flexion resistance, with additional interchangeable stance flexion springs supplied to accommodate a wide range of patient weights and activity levels.

Features and Benefits

- Polycentric geometry creates effective shortening for improved ground clearance mid-swing
- Adjustable stance flexion with 9° of movement provides shock absorption at heel strike
- Independently adjustable flexion and extension of the pneumatic swing phase control
- Adjustable Stance Phase Sensitivity by means of changing the ICR
- Integral extension assist spring
- Available with built-in proximal pyramid or threaded adapter
- Equipped with built-in knee cap, increasing safety and preventing clothing from becoming caught in the mechanism

NSSK615-THR

Knees - Trulife - Seattle Select Stance Flexion Knee

Ordering Information

Trial Period - There is no trial period on this knee.

Impact Level Descriptions

Medium: Medium impact activities including light sports.

High: High impact activities such as running and basketball.

Part Number	Description
NSSK615	Select Stance Flexion Knee with integral pyramid
NSSK615-THR	Select Stance Flexion Knee with M36 threaded top

Additional Parts Ordering Information

Use with Threaded Pyramid Adapter	Weight limit	Man.
NTI-O1MS	166kg	APC

Using this adapter with the NSSK615-THR threaded top version of the knee allows a weight limit of 125kg, whilst providing the ease of alignment of the pyramid top version.

Manufacturer:
APC = American Prosthetic Components

Technical Information
